5 respect to the header(s) within the specification as following:

a) -- **Background of the Invention** --: The specification should set forth
Background of the Invention in two parts: --**Field of the Invention** -- and -- **Description of the
Related Art** --.

Under **Description of the Related Art**, Applicant typically lists well-known arts in the

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the
basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

20 (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on
sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-5, 9, and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by
Yamashita et al. (US 5,389,769, hereinafter “Yamashita”).

Art Unit: 2876

Re claims 1 and 9, Yamashita discloses a method of attaching an identification tag 30A and 30B to the part 10 of a semiconductor processing tool 1 (see figures 1A and 9; also see abstract). As shown in figure 1A, identification tag 30A is placed in a shallow cup/indent receiving the tag (col. 3, lines 65+).

5 Re claims 2 and 4, the tag is integrated to the cup with resin (col. 3, lines 65+).

Re claim 3, in another embodiment, the ID can be embodied with a barcode or other label type which can be attached and detached (col. 2, lines 13+).

Re claim 5, the ID chip communicates with a fixed station utilizing a radio frequency (col. 2, lines 47+; col. 3, lines 22-32; col. 4, lines 7+)

10 Re claim 10, the space created by container 10 is a processing chamber (col. 4, lines 1+).

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

15 (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

20 5. Claims 6-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yamashita et al. (US 5,389,769).

Re claims 6-8, Yamashita does not use the term "coil", however, as illustrated in figure 2, the ID tag 30A communicates with a fixed station 20. The fixed station is comprised of a
25 modulating circuit 25, demodulating circuit 22 and signal transmitting and receiving antenna 21. As further shown in figure 8, the semiconductor processing facility has more than one processing

device since they are identifiable (otherwise, there's no need to identify) (col. 2, lines 31-46; col. 4, lines 25+)

Conclusion

5 I. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure: Lantz et al. (US 5,886,896); Ellis et al. (US 6,418,352) ; Elger (US 6,594,546) disclose semiconductor processing apparatus. Applicant is respectfully suggested to carefully review these references.
